

DAILY INTERNSHIP LOG

Date: July 21, 2026

Date: July 21, 2020
Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

A. Daily Accomplishments	
Date:	July 21, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Attended an orientation and became familiar with the IT Department's daily operations. 2. Observed the different tasks handled by the IT personnel. 3. Discussed possible system projects that could be useful for the hospital. 4. Started brainstorming an idea for the TGMCI Radiology Queueing System. 5. Identified some basic problems that the Radiology queueing system could help address, such as organizing patient queues for X-Ray, Ultrasound, and CT Scan and monitoring their turn.
Outputs Completed:	Became familiar with the IT Department's work environment. • Identified the Radiology Department as a possible area for system development. • Listed initial ideas and possible features for the TGMCI Radiology Queueing System.
Hours Rendered:	8 hours

B. Daily Learning Experience

Daily Learning Experience	
Learning/ Knowledge Gained	I learned about the daily responsibilities of the IT Department and how technology supports the different departments in the hospital. I also learned that identifying a problem is an important first step before developing a system.
Skills Developed	Observation, communication, problem identification, and basic system planning.
Challenges Encountered	I was still unfamiliar with the workflow of the hospital and how patients are handled in the Radiology Department.
Actions Taken	I observed the workplace, listened to the explanations of the staff, and took note of information that could help in planning the proposed system.
Key Takeaway	Understanding the actual workflow and needs of the users is important before designing or developing a system.

DAILY INTERNSHIP LOG

Date: July 22, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	July 22, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Continued brainstorming the proposed TGMCI Radiology Queueing System. 2. Discussed possible features and functions such as queue ticket generation, room-based queue management, and a public queue display. 3. Considered how IPD and OPD patients could be assigned queue numbers for X-Ray, Ultrasound, and CT Scan and how their queue status could be monitored. 4. Organized the initial ideas for the proposed system. 5. Observed how hospital staff currently manage their daily tasks and processes.
Outputs Completed:	Created an initial concept for the TGMCI Radiology Queueing System. • Listed possible features such as short queue number assignment, printed queue tickets, patient calling, and an incoming and now-serving public display. • Improved the initial system idea based on observations.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned how brainstorming helps in organizing system ideas and determining which features may be useful to the intended users.
Skills Developed	System analysis, brainstorming, critical thinking, and documentation.
Challenges Encountered	It was difficult to determine which features should be prioritized because the actual workflow of the Radiology Department still needed to be understood further.
Actions Taken	I focused on the basic functions first and observed how the current process works before considering more advanced features.
Key Takeaway	A system should focus on solving the most important problems first instead of adding unnecessary features.

DAILY INTERNSHIP LOG

Date: July 23, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department / HR Department

A. Daily Accomplishments

Date:	July 23, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department / HR Department
Activities Performed:	1. Assisted the HR Department by printing documents and other required papers. 2. Checked the documents before printing to make sure the correct files were selected. 3. Organized the printed documents before giving them to the HR personnel. 4. Observed the proper handling of office documents and printing equipment. 5. Continued reviewing ideas for the TGMCI Radiology Queueing System during available time.
Outputs Completed:	Printed the requested documents for the HR Department. • Organized and prepared the printed papers for distribution. • Continued documenting ideas for the proposed TGMCI Radiology Queueing System.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned the importance of properly handling documents and checking files carefully before printing, especially in a professional workplace.
Skills Developed	Document handling, attention to detail, printer operation, organization, and time management.
Challenges Encountered	I needed to make sure that the correct documents and number of copies were printed without wasting paper or ink.
Actions Taken	I carefully checked the files and printing settings before starting the printing process.
Key Takeaway	Even simple tasks require accuracy and responsibility because mistakes can result in wasted resources and delays.

DAILY INTERNSHIP LOG

Date: July 24, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	July 24, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Observed the department heads while they checked and troubleshot a telephone problem. 2. Observed how they identified possible causes of the issue before attempting a solution. 3. Learned about basic checking of telephone connections and cables. 4. Observed how IT personnel communicate with staff when resolving technical problems. 5. Assisted by preparing or handing over materials and equipment when needed.
Outputs Completed:	Observed the troubleshooting process for a telephone-related issue. • Learned the basic steps used in identifying hardware or connection problems. • Gained practical knowledge about workplace technical support.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned that troubleshooting involves checking possible causes one at a time instead of immediately assuming which component is damaged.
Skills Developed	Technical observation, troubleshooting awareness, communication, and problem-solving.
Challenges Encountered	Some of the telephone components and connections were unfamiliar to me.
Actions Taken	I closely observed the troubleshooting process and asked questions when appropriate to better understand what was being checked.
Key Takeaway	Technical problems should be approached systematically by identifying and eliminating possible causes.

DAILY INTERNSHIP LOG

Date: July 27, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	July 27, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Observed the department heads while troubleshooting and fixing printer-related problems. 2. Observed how they checked printer connections, cables, paper placement, and basic printer settings. 3. Learned about common printer issues such as paper jams, connection problems, and printing errors. 4. Reviewed the activities and knowledge gained during the first week of internship. 5. Continued organizing ideas for the proposed TGMCI Radiology Queueing System.
Outputs Completed:	Observed the proper troubleshooting process for printer problems. • Became more familiar with common printer issues and basic troubleshooting procedures. • Organized the initial ideas gathered for the TGMCI Radiology Queueing System. • Completed the first week of internship activities.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned about common printer problems and how IT personnel inspect both the hardware and software settings when troubleshooting.
Skills Developed	Technical observation, basic hardware troubleshooting, problem-solving, and system planning.
Challenges Encountered	I was not yet familiar with all of the possible causes of printer problems and the proper troubleshooting procedures.
Actions Taken	I observed each troubleshooting step carefully and took note of the procedures used by the IT personnel.
Key Takeaway	My first week showed me that working in IT involves both technical skills and understanding the needs of different departments. Careful observation and continuous learning are important when dealing with real workplace problems.

DAILY INTERNSHIP LOG

Date: July 28, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	July 28, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Assisted in preparing and printing bathroom reminder signs needed by the hospital. 2. Reviewed reminders such as not flushing tissues and other proper bathroom practices. 3. Checked the sign layouts and wording before printing multiple copies. 4. Monitored the printer, paper, and ink while handling the large printing request. 5. Continued discussing the TGMCI Radiology Queueing System during available time.
Outputs Completed:	• Prepared bathroom reminder signs for printing. • Printed multiple copies of the required hospital signs. • Continued recording ideas for the TGMCI Radiology Queueing System.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned that hospital signs must be clear, readable, and carefully checked because they communicate important reminders to patients, visitors, and staff.
Skills Developed	Document checking, high-volume printing, attention to detail, organization, and time management.
Challenges Encountered	The large number of signs required careful monitoring to avoid printing errors and wasting paper or ink.
Actions Taken	I checked the layout and wording before printing and regularly monitored the printer and supplies.
Key Takeaway	Careful preparation is important when producing many copies of materials for hospital use.

DAILY INTERNSHIP LOG

Date: July 29, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	July 29, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Continued printing bathroom signs containing reminders required for hospital compliance with DOH guidance. 2. Printed signs about not flushing tissues and other bathroom rules. 3. Checked completed pages for clear text, correct alignment, and consistent print quality. 4. Sorted the printed signs to prepare them for lamination. 5. Discussed the queueing system with the team when the printing workload allowed.
Outputs Completed:	• Completed another batch of bathroom signs. • Sorted the printed pages for the next step. • Continued discussing the proposed queueing system.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned how to maintain consistency and accuracy while completing a high-volume printing task.
Skills Developed	Printer operation, quality checking, sorting, attention to detail, and task prioritization.
Challenges Encountered	Some pages needed to be checked carefully to make sure the text and print quality were acceptable.
Actions Taken	I reviewed the printed pages as each batch was completed and separated any page that needed to be printed again.
Key Takeaway	Quality checks help prevent errors from continuing throughout a large printing job.

DAILY INTERNSHIP LOG

Date: July 30, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	July 30, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Helped complete the printing of almost 100 pages of bathroom reminder signs. 2. Learned the basic operation and safety precautions of the laminating machine. 3. Prepared the printed signs and laminating materials. 4. Practiced placing each sign properly inside a laminating pouch. 5. Continued a short discussion about the TGMCI Radiology Queueing System.
Outputs Completed:	• Helped complete almost 100 printed pages of bathroom signs. • Prepared the signs and materials for lamination. • Learned the basic laminating procedure.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned how lamination protects printed materials and how proper placement helps prevent wrinkles, bubbles, and uneven edges.
Skills Developed	Laminating, material preparation, equipment handling, patience, and accuracy.
Challenges Encountered	I was unfamiliar with the laminating machine and needed to avoid misaligned sheets and damaged pouches.
Actions Taken	I followed the instructions carefully and practiced with guidance before handling more of the printed signs.
Key Takeaway	Using office equipment properly requires patience, careful positioning, and attention to safety.

DAILY INTERNSHIP LOG

Date: July 31, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	July 31, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Continued laminating the printed bathroom signs. 2. Checked each laminated sign for wrinkles, bubbles, or incomplete sealing. 3. Sorted and organized the finished signs. 4. Learned how to identify and correct simple printer problems during the remaining printing tasks. 5. Continued exchanging ideas about the queueing system during available time.
Outputs Completed:	• Laminated and checked another batch of bathroom signs. • Organized the completed signs. • Practiced basic printer troubleshooting.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned how to inspect laminated materials and how to check simple printer issues such as paper placement, paper jams, and connection problems.
Skills Developed	Laminating, quality inspection, organization, printer troubleshooting, and problem-solving.
Challenges Encountered	The repetitive workload required concentration, and minor printer issues could interrupt the printing process.
Actions Taken	I checked each laminated sign and followed basic troubleshooting steps when the printer did not operate normally.
Key Takeaway	Regular checking and simple troubleshooting can keep a large office task moving efficiently.

DAILY INTERNSHIP LOG

Date: August 3, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	August 3, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Helped finish laminating the remaining bathroom signs. 2. Inspected and organized the completed signs for hospital use. 3. Reviewed the printing and laminating work completed during the week. 4. Practiced solving simple printer problems encountered during printing. 5. Continued discussing the direction and possible features of the TGMCI Radiology Queueing System.
Outputs Completed:	• Completed the printing and lamination of the bathroom signs. • Organized the finished materials for distribution. • Continued planning the TGMCI Radiology Queueing System. • Improved my understanding of basic printer troubleshooting.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned how printing, lamination, quality checking, and organization work together when preparing materials for hospital use.
Skills Developed	High-volume printing, laminating, quality control, basic printer troubleshooting, teamwork, and time management.
Challenges Encountered	The printing and laminating workload left limited time to focus on the queueing system.
Actions Taken	I prioritized the hospital's urgent printing requirements and used available time to continue discussing the system with the team.
Key Takeaway	Work priorities can change, so it is important to complete urgent tasks while continuing long-term projects whenever time is available.

DAILY INTERNSHIP LOG

Date: August 4, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	August 4, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Sorted and prepared the laminated restroom signs for installation by floor. 2. Began placing the signs in hospital restrooms, including restrooms inside patient rooms. 3. Installed signs on the 7th and 6th floors. 4. Learned from an IT department head how to arrange, crimp, and check a UTP cable with an RJ45 connector. 5. Began planning the prototype and activity diagram for the TGMCI Radiology Queueing System.
Outputs Completed:	• Installed laminated restroom signs on the 7th and 6th floors. • Learned the basic UTP-to-RJ45 cable-crimping procedure. • Identified the main steps needed for the system prototype and activity diagram.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned the correct order of UTP wires, how an RJ45 connector is crimped, and why the finished cable must be checked before use.
Skills Developed	UTP cable preparation, RJ45 crimping, organization, installation, and workflow analysis.
Challenges Encountered	There were many restrooms and patient rooms to check while moving through each floor.
Actions Taken	I followed a floor-by-floor route and checked each location after placing the signs.
Key Takeaway	A systematic route helps complete hospital-wide work accurately and efficiently.

Certified by:

Name & Signature of HTE Supervisor

DAILY INTERNSHIP LOG

Date: August 5, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	August 5, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Continued installing laminated restroom signs throughout the hospital. 2. Placed signs in common restrooms and patient-room restrooms on the 5th and 4th floors. 3. Checked the signs for clear visibility and proper placement. 4. Started building the prototype of the TGMCI Radiology Queueing System. 5. Outlined the system flow from selecting a procedure and generating a queue number to patient waiting.
Outputs Completed:	• Installed and checked signs on the 5th and 4th floors. • Developed the initial reception and queue-number parts of the prototype. • Organized the remaining signs for the next floors.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned how an activity diagram can guide prototype development by showing the correct order of actions in the queueing process.
Skills Developed	Prototype development, sign installation, activity-diagram creation, sequencing, and time management.
Challenges Encountered	The physical installation work had to be balanced with the time needed to prepare the system diagram.
Actions Taken	I completed the assigned floors first and used the remaining time to continue the diagram.
Key Takeaway	Dividing time between field work and system documentation helps both tasks continue steadily.

Certified by:

Name & Signature of HTE Supervisor

DAILY INTERNSHIP LOG

Date: August 6, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	August 6, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Continued placing laminated signs in hospital restrooms and patient rooms. 2. Installed and checked the signs on the 3rd and 2nd floors. 3. Confirmed that the reminders were easy to see and read. 4. Continued developing the queueing-system prototype and its required diagrams. 5. Helped diagnose and fix simple technical issues reported by another hospital department.
Outputs Completed:	• Completed sign installation on the 3rd and 2nd floors. • Added queue-management functions and diagram details to the prototype work. • Resolved simple technical concerns with guidance when needed.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned how to apply basic troubleshooting steps while continuing to connect the staff dashboard, assigned room, and public display in the prototype.
Skills Developed	Basic technical troubleshooting, prototype development, process mapping, diagramming, and system analysis.
Challenges Encountered	The diagram needed to show the queue flow clearly without leaving out important staff actions.
Actions Taken	I reviewed the actual queueing steps and arranged them in the correct sequence before adding them to the diagram.
Key Takeaway	System diagrams are clearer when they are based on the actual steps followed by users.

Certified by:

Name & Signature of HTE Supervisor

DAILY INTERNSHIP LOG

Date: August 7, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	August 7, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Continued the floor-by-floor installation of laminated restroom signs. 2. Placed the remaining signs in restrooms and patient rooms on the 1st and ground floors. 3. Checked the installed signs for proper placement and readability. 4. Continued building and checking the queueing-system prototype. 5. Assisted other departments by independently handling simple computer and peripheral issues.
Outputs Completed:	• Completed sign installation from the 7th floor down to the ground floor. • Tested the developing prototype and reviewed its activity diagram. • Completed simple technical support tasks for other departments.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned the value of testing prototype functions and applying a clear troubleshooting process before considering a task complete.
Skills Developed	Prototype testing, technical support, installation, diagram review, teamwork, and attention to detail.
Challenges Encountered	Completing the lower floors required making sure that no restroom or patient-room location was overlooked.
Actions Taken	I checked each assigned location and reviewed the completed floor coverage with the team.
Key Takeaway	Final checks help confirm that all required hospital areas and system steps have been covered.

Certified by:

Name & Signature of HTE Supervisor

DAILY INTERNSHIP LOG

Date: August 10, 2026

Time: 8:00 AM - 5:00 PM

Department/Area: IT Department

A. Daily Accomplishments

Date:	August 10, 2026
Time:	8:00 AM - 5:00 PM
Department/Area:	IT Department
Activities Performed:	1. Reviewed the completed restroom-sign installation from the 7th floor to the ground floor. 2. Confirmed that signs were present in the required common and patient-room restrooms. 3. Continued developing and improving the TGMCI Radiology Queueing System prototype. 4. Refined the activity diagram and other diagrams needed to document the system. 5. Reviewed the week's prototype work and the simple technical issues handled for other departments.
Outputs Completed:	• Confirmed the hospital-wide distribution of the laminated restroom signs. • Improved the queueing-system prototype and activity diagram. • Organized the prototype and system-diagram work for further review.
Hours Rendered:	8 hours

B. Daily Learning Experience

Learning/ Knowledge Gained	I learned that building a prototype, reviewing diagrams, and solving real technical issues develop both system-design and support skills.
Skills Developed	Prototype development, documentation, diagramming, troubleshooting, organization, and quality checking.
Challenges Encountered	The diagrams needed to match the actual radiology queueing workflow and remain easy to understand.
Actions Taken	I compared the diagram steps with the system process and revised sections that needed clearer flow.
Key Takeaway	Accurate diagrams provide a useful guide for understanding and improving the queueing system.
